

# Learning for sustainable impact

**CINQP**

CINOP creates well-founded, integrated and practical solutions for complex educational and labour market issues.

As your strategic partner in learning, we are dedicated to promote an optimum participation for all citizens in society, both now and in the future.

We do not do this alone, but work together with educational, governmental and private sector organisations.

## **Expertise with impact, powerful in connection**

Our solutions are well-founded, applicable and integral. Solutions with impact. We are specialised in

- making education more flexible
- professionalisation of teachers and teams
- issues at the intersection of the labour market and learning: Lifelong development for all.

## **Passion for learning**

The value of CINOP lies in our people: driven, professional, curious and socially involved. But above all: with a passion for learning. Our approach is unique.

We provide a range of solutions covering:

- support with vision and policy processes and their implementation
- programme and project management
- expertise development through training, coaching and courses
- team development and team coaching
- monitoring, data analysis, policy and practical research
- curriculum and instrument development.

## **Together we make projects succeed**

Lifelong learning for all is a goal close to our heart. We have always spoken the language of education. Collaboration is in our DNA; it is the engine of our enthusiasm to realise projects with impact with our partners. Together we want to make the Netherlands number 1 in learning.

## **For and with organisations in education, government and the private sector**

We are a strategic partner for organisations with the challenge to ensure lifelong development of people. CINOP is a social enterprise. We do not strive for maximisation of profit but rather for sufficient revenue to guarantee continuity and innovation for our clients.

Our strength at connecting people enables us to give people every opportunity to work on their personal development and thus be able to contribute to society.

Expertise  
with impact,  
powerful  
in connection

## Active worldwide

CINOP is also dedicated to fostering international mobility and European learning opportunities for students, adults and professionals in vocational education. Furthermore, given our knowledge and experience vis-à-vis the design and development of education, we are also involved in international cooperation for capacity development of educational institutes in the Global South.

## In-house centres of expertise

CINOP has two centres of expertise:

1. Centre for expertise in a variety of research methods and techniques in vocational education and training. Offering solutions to complex knowledge issues for the benefit of further education, the labour market and social participation.
2. The expertise centre for inclusive education develops and implements, in collaboration with stakeholders, innovative and practical solutions for learning without obstacles: accessible education for all.

We are real  
go-getters: we like to  
do things and make  
sure that we really  
create changes

## How can we help you?

Are you wondering what we can do for you? Contact us and discover the possibilities. Or take a look at our website and be inspired by our customer cases, projects and publications.
